

# (ELR) Electric Latch Retraction

Our motor driven electrified latch pullback exit device allows for remote keyless access control in high occupancy / high traffic conditions where exit devices are required. Common applications include conditions such as hospitals, airports, schools, churches and they are commonly specified in applications that require automatic door openers. The device may be continuously energized allowing for a push / pull condition if desired.

## Features:

- Available on 9800 Series, including rim, vertical rod, concealed vertical rod, mortise exit device, fire and non fire-rated devices
- MM4 Smart Module: On board diagnostics with audible feedback for adjustment and power issues
- “PTS” (Push to Set Technology): 5 second electronic adjustment for easy post installation adjustment
- Electric dogging rated for continuous duty - Auto retraction if dogged push pad is pulled from position
- Low Current Draw - Field switchable to “High Torque” mode
- Up to 300’ wire run with (2) 18ga wire - Long wire runs provides installer with convenience of placing the locking device power supply in a centralized location; i.e. the same closet as the access panel
- 8’ cable with Quick Connect for MM4 module to easily connect to power supply lead
- 3-year “No Hassle” warranty

## Specifications:

- Voltage – 24 to 28V DC
- System protection – unit shutdown when voltage exceeds 28V DC
- Average In-rush Current – 900mA; Average Hold Current - 215mA
- PTS adjustment – approx. ¼”
- Wire run: 300’ with 18ga wire

**INSTALLED ON THE EXIT  
DEVICE: USE FLR2298 ADD**

**FOR FIELD INSTALLATION  
USE FLR2298 KIT**

## To Order:

- **Must Specify: Exit Device item #** and **FLR2298 ADD** as two separate line items.  
For Example: A9800EO36 US32D with ELR option, order “**A9800EO36 US32D**”, and “**FLR2298 ADD**” as two line items.
- **\*Use FLR2298 KIT if ordered separately.**
- **Optional Switch** (RX or LX) is also available and should be added as a **3<sup>rd</sup> line item** as needed.

**Note:** When using electrified hinge, you must use prefix ELELRn + hinge item code, where “n” is equal to number of wires. For example: ELELR4 + BB31.

**MUST USE CRP POWER SUPPLIES TO  
HONOR WARRANTY (see pages 97-98)**

# Signal Switch RX and LX

**RX** (request to exit) signal switch is used to signal the use of an opening from the push side. When the push pad is depressed, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the touch bar.

**LX** (latch bolt monitoring) signal switch monitors both egress and access of an opening. When the latch bolt is retracted, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the latch bolt position.

**LX** and **RX** switches can be combined.

**LX, RX** switches can be used in combination with ELR (electric latch retraction) option.

## Specifications

**RX** or **LX**.....Switch rated 0.5 amps @ 24V AC / DC resistive  
Low current **RX** or **LX**.Switch rated 0.5 amps @ 24V AC / DC resistive

## for Factory Installed. To Order, Specify:

- RX22/98**.....Request to Exit switch for field installation
- LX9800**.....Latch bolt Monitoring switch for field installation
- LXRX9800**.....Latch bolt Monitoring / Request to Exit Combination
