CUTTING BRUSH:

3. Re-install the brush until it is level with one end of the retainer and crimp to hold it in place.

DOOR BOTTOM RETAINER:

1. Determine the required length, mark and cut the door bottom sweep to full width of the door.
2. When trimming, remove parts of the brush seal to be trimmed and use a cutting tool (lineman side cutting pliers) to compress the end of seal. This will retain the brush. Trim the aluminum retainer with a hacksaw.
3. Close the door and place door bottom sweep along outside bottom edge of door so that it makes contact with threshold. Mark door in center of slotted holes.
